Stove Performance Tips

For questions, comments, or problems call 1.800.783.8347
(Do Not Return Stove to Place of Purchase)

Did You...

1. Connect hose/regulator set properly ensuring that the hose fitting is tight (with a wrench) and that the regulator is properly connected to the propane tank.
2. Again check all fittings so that they are tight and not leaking.
3. Make sure that the valves are in the "OFF" position while connecting the regulator to the tank. Slowly turn valves to an "ON" position to light burner.
4. For fine flame adjustment: Adjust ON/OFF knob between the "OFF" and "HIGH" position for lower or warming output.

SYMPTOM:

Flame is very small and you think there's not enough propane getting through to the burners.

SOLUTION:

The regulator may be in a low flow safety condition. 1) Check all fittings to ensure tightness and no leaks. 2) Close all valves to a fully "OFF" position—wait 5-10 seconds and relight the burners.

SYMPTOM:

An orange flame that blackens utensil (pot, Dutch oven, etc.)

SOLUTION:

A- The "Air Vent" may be closed. Correct by rotating the "Air Vent" to an open position until a blue flame is present (air vent is at the outside neck of the cast iron burner).

B- There is a blockage or obstruction in the neck or venturi tube of the burner, ie: cob webs, wasp or bee nests, dirt or other debris. Clean with pipe cleaner or wire hanger.

Care & Use

FIRST TIME USE

Wash in Warm Soapy Water, Rinse and Dry Thoroughly.

SEASONING

Preheat Griddle on Burner. Using a Paper Towel or Soft Cloth, Wipe with a Thin Coat of Lard or White Shortening. If Using Vegetable Oil, Use an Extremely Thin Coat and Wipe Any Excess. If Too Much is Used, Your Griddle Will Become Sticky and Rancid. If This Happens, Wash in Warm Soapy Water Using a Plastic Scrubber to Remove Film.

COOKING ON YOUR GRIDDLE

For Best Results, Wipe Griddle with a Thin Coat of Oil Before Each Use. Do Not Use High Heat When Cooking. High, Intense or Uneven Heat May Warp Your Griddle. Gradually Heat Griddle to Cooking Temperature. Rust Spots or a Metallic Flavor is a Sign of Improper Seasoning—Simply Clean Griddle Well, Removing Rust Spots, and Reseason. Your Griddle Will Turn Dark Over Time. This is a Sign of Good Seasoning and is No Cause for Concern.

GRIDDLE STORAGE

After Use, Simply Wipe Clean, or if Needed, Use a Mild Soap and Warm Water. **NEVER USE ABRASIVE CLEANERS.** Rinse and Dry Thoroughly. It is Also a Good Idea to Wipe a Thin Coat of Oil on Your Griddle Before Storing.
