

**INSTRUCTIONS FOR USE**  
**Do not use the harness without having read carefully these technical instructions.**

This product is designed and manufactured to be used with a dynamic UIAA rope. If used together with static equipment alone (low-stretch rope, tape slings...) and if there is risk of a fall, it is essential to introduce a shock-absorber into the safety chain to lower the potential shock load.

This sit harness may be used in conjunction with a chest harness.  
 Do not use chest harness alone. Risk of injury!

**Important notice: Specific training is essential before use**  
 This technical notice illustrates ways of using this product. Only some types of misuse and forbidden uses currently known are represented. (Shown in the crossed-out diagrams). Many other techniques of misuse exist, and it is impossible to enumerate, or even imagine all these. Only the techniques of use shown in the diagrams and not crossed out are authorised. All other uses are excluded due to the danger of death. In case of doubt, problem of understanding, contact HUDYSPORT. Climbing, caving, rappelling, ski-touring, rescue, work at high and exploration are dangerous activities which may lead to severe injury or even death. An adequate apprenticeship in appropriate techniques and methods of security is your own complete responsibility. You personally assume all the risk and responsibilities for all damage, injury or death which may occur during or following use of our product in any manner whatsoever. If you are not able, or not in a position to assume this responsibility or to take this risk, do not use this equipment.

**Use**  
 This product must be only used by competent and responsible persons, or those under the direct and visual control of a competent and responsible person. Check the compatibility of the harness with the other components of your equipment. To prolong the life of your harness, care in use is necessary. Avoid rubbing against abrasive surfaces or sharp edges.

**Safety=verification**  
 To ensure the good maintenance of this harness it is best to allocate it to a sole user. The user must put the harness on and test it out (walking, sitting, standing, plus in suspension) to ensure a good fit and appropriate level of comfort for the intended use. It is important that the user check buckles and other fastenings regularly during use.

Before and after each use it is necessary to check the condition of webbing and stitching, including the less accessible areas. Do not hesitate to scrap a harness showing signs of wear which might affect its strength.

Any modification or repair of your harness outside our production facilities is forbidden. It is up to the user to foresee situation requiring rescue in case of difficulties encountered while using this product.

**Major falls**  
 The harness should be not used after a major fall: internal, non-visible rupturing can cause premature ageing. Do not hesitate to contact us in case of doubt.

**Cleaning**  
 A dirty harness should be cleaned, by hand or in a machine, on a delicate material wash and rinsed in clean water (max. temp. 30°C). Then dried in a cool, well ventilated, dark room. Grease spots may be removed with trichlorethylene. Webbing dampened during use or washing, shrinks very slightly.

**Disinfection**  
 If disinfection is necessary, use a disinfectant which is compatible with polyamid and polyester. Leave the harness for one hour in a solution diluted with clean water at a maximum temperature of 20°C. Afterwards rinse with clean cold water. Dry slowly, away from direct heat sources.

**Chemicals**  
 All chemical products, corrosive materials and solvents should be regarded as harmful to a harness.

**Carriage and storage**  
 Despite its UV protection it is recommended that the harness is stored away from direct light, in a well ventilated place away from all sources of direct heat. Check that the harness is not too crumpled or twisted.

**Temperature**  
 Always keep the harness between a minimum of 40°C and a maximum of 80°C, otherwise the strength of the material may be altered, the guarantee, KONG, is not responsible for the consequences, direct, indirect, accidental or any type of damage befalling or resulting from use of this products. This harness may be used with other components in compatible system.

**Lifetime and inspection**  
 After first use this product may have a life of up to 5 years, without taking wear into account. However wear or damage could occur on the first use which limits its lifetime to that use. Shelf life of this product in good condition is up to 3 years.

In addition to check before and after use, we recommend complete inspection every 3 months.

**Check for:**  
 The fabric: Cuts, tears, abrasion and damage caused by general deterioration, heat or chemicals e.Lc.

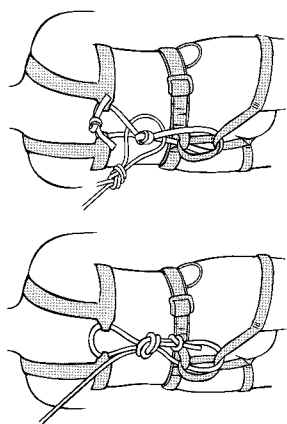

The stitching: Cut, torn, worn or loose threads.

The buckles: Proper function of the buckles.

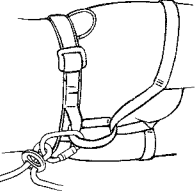

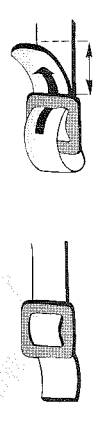

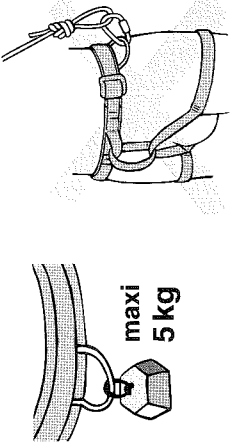

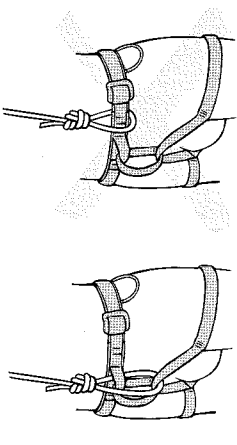

**HUDYSPORT guarantee**  
 This product is guaranteed for 3 years against any faults in materials or manufacture. Limitations of the guarantee: normal wear and tear, non authorised modification or alterations, bad storage, accidents, negligence, damage, and uses for which the product is not designed, are not covered by the guarantee. HUDYSPORT is not responsible for the consequences, direct, indirect, accidental or any type of damage befalling or resulting from use of this products. This harness may be used with other components in compatible system.

**ACHTUNG / WARNING / UPOZORNĚNÍ**

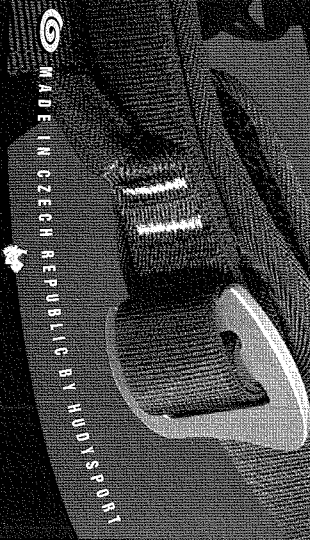

Zur Verwendung mit einem Brustgurt / For use with a chest harness /  
 Použití s prsním úvazem / A utiliser avec un baudrier torse /  
 Da utilizzare con una imbracatura pettorale

Empfohlene Anseilart / Tying-on advised / Způsob narázování /
